Ryan Cunnane, MD

11:25 **Digital Health and Heart: The Future is Here**
Hamid Ghanbari, MD

12:00 pm Question and Answer Panel

12:20 Course Adjourns

TARGET AUDIENCE

This course will be particularly relevant to cardiologists, internists, family physicians, and other health care providers managing patients with cardiac arrhythmias.

COURSE OBJECTIVES

Cardiac arrhythmias, particularly atrial fibrillation, affect many patients and are a common clinical problem encountered in daily practice. However, as a result of recent advances in basic and clinical research, and development of new technology, our understanding of the mechanisms of arrhythmias and management strategies rapidly evolves. The goal of this course is to present and discuss recent advances in the management of cardiac arrhythmias with primary care physicians, internists, and cardiologists.

Upon completion of this course, the participant will:

- learn more about recent advances in treatment options in patients with atrial fibrillation and how to select patients for appropriate therapy.
- better understand the new guidelines for anticoagulation in patients with atrial fibrillation.
- learn about management strategies of patients with PVC and ventricular tachycardia.
- be able to identify patients appropriate for leadless implantable devices, ICD and cardiac resynchronization therapy.
- learn more about management of sleep apnea and arrhythmias.

ACCREDITATION

The University of Michigan Medical School is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. The University of Michigan Medical School designates this live activity for a maximum of 4.5 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Applications have been submitted to the American Osteopathic Association and the American Academy of Family Physicians for credits. Determination of credit is pending. Other credits by specialty may apply.
